PREFACE

This Directory of Structural Engineers issued in March 2010 contains names addresses and other contact details of Corporate Members of the Institution who have been identified by the Institution as qualified to certify structural designs and drawings of buildings that come under the purview of the Urban Development Authority and local government Authorities.

The Directory would be updated from time to time.

EXECUTIVE SECRETARY

March 31, 2010

PREAMBLE

The Institution of Engineers, Sri Lanka (IESL) was established by an Act of Parliament and is authorized to grant the status of Chartered Engineer in the fields of Civil Engineering, Mechanical Engineering, Electrical and Electronic Engineering, Chemical Engineering, Metallurgical Engineering, Agriculture and Plantation Engineering, Mining Engineering and Marine Engineering.

The Corporate Members of this Institution use the title "Chartered Engineer" or "CEng." after their names together with the acronym "MIE (Sri Lanka)" if they are in the grade of Member and the acronym "FIE (Sri Lanka)" if they are in the senior grade of "Fellow".

The Urban Development Authority (UDA) has passed regulations where all multi-storey buildings of more than 3000 sq. ft. in area, and other selected structures shall be constructed only based on structural designs prepared by qualified personnel in this field and has requested the Institution of Engineers, Sri Lanka, to identify persons of such standing.

Consequently, the IESL has prepared a list of Civil Engineers who are Chartered Engineers and who fall into the category of qualified persons eligible to design and supervise the construction of these buildings and other engineering structures, to certify structural engineering aspects of these buildings.

According to the request made by the UDA these qualified persons in the relevant fields have been categorized into three groups namely, those who qualified to design and supervise buildings with up to four-storeys, buildings up to and including eight-storeys and buildings with up to and more than eight storeys. The Directory also identifies limitations of such qualified personnel to certify buildings of more than eight storeys.

The IESL has also issued a seal to its members who are qualified to certify calculations and drawings pertaining to all civil and structural engineering works in terms of the UDA regulations.

Please note that the IESL has made it mandatory for its members to use this seal when certifying structural calculations or any other documents to the relevant authority. The format of the seal is given below.

THE INSTITUTION OF ENGINEERS, SRI LANKA	
	ABCD FERNANDO CHARTERED ENGINEER
MEMBERSHIP NO. F -11740	VALID UP TO 31 03 2010

DISCLAIMER

The Institution of Engineers, Sri Lanka (IESL) does not take responsibility or liability for any actions or omission on the part of these listed engineers in carrying out any work related to or outside their field of speciality. A person or an organization who wishes to seek the services of these listed engineers should do so by contacting the listed member/s directly and for a fee determined between such member/s and such person. The IESL does not recommend or determine any fee structure for the services rendered by these personnel which will entirely be dependant on the party who seek services from the listed members. The IESL also is not liable for any acts or omissions done by the listed members in providing their services.
